SST™ PROFIBUS Interfaces

For Controlling and Monitoring PROFIBUS Applications

Features

- PCI/PCIe bus formats available with one and two channels
- Simultaneous execution of PROFIBUS DP Master, DP Slave and FDL (layer 2)
- Master Class 1 and Class 2 DPV1 support through Windows API
- Supports all standard baud rates: 9.6 Kbaud to 12 Mbaud
- Flash memory for storage of configuration
- Supports device configuration and diagnostics through FDT using commDTM
- Supports all PROFIBUS baud rates including 45.45 kbps
- Diagnostic LEDs for system status, watchdog timeout, and communications status

OS and Drivers Supported

- Windows NT4 / 2000 / XP drivers
- DP configuration software with enhanced diagnostics
- OPC Server v3.0
- Open, documented memory map interface with example C source code and Windows 32-bit DLLs for custom driver development

BradCommunications™ network interface cards are ideal for applications where high-performance control and reliability are required. Backed by superior support and service, BradCommunications network interfaces support a wide range of network protocols and bus formats.

Overview

BradCommunications SST™ network interface cards for PROFIBUS can be found in many applications including:

- Operator interface
- Human-machine interface
- PC control
- Device development
- Network diagnostics
